

Patient Information:

Name: David Johnson

Age: 32

Gender: Male

Date of Birth: 1992-11-05

Blood Group: O+

Height: 180 cm

Weight: 75 kg

Diagnosis: Fractured Tibia and Fibula (Left Leg)

Follow-up Date: 2024-05-10

Operation Date: 2024-04-20

Medical History:

- No previous history of fractures
- No family history of bone disorders
- Moderate physical activity level

Additional Comments:

David suffered a fall while playing basketball, resulting in a compound fracture of the left tibia and fibula. Open reduction and internal fixation (ORIF) surgery was performed to stabilize the fracture. Physical therapy sessions have been scheduled to aid in rehabilitation.
